概述			
NN bookmark20250528021100422251172311 "Dangerous Permission over Accounts with Replication Rights			
All domain users have ForceChangePassword permission against three accounts which have DCsync ability.			
" "All standard domain users can change passwords of high privileged users who have Replication rights. DCsync attack is thus possible for adversary to achieve domain dominance.			
" Revoke Replication, ForceChangePassword rights from non-essential accounts, including both user and service accounts, unless absolutely required
